

Some of the projects completed from the Data Science Specialization

- <https://fmarin7.shinyapps.io/shinyApp/> Shiny App – created app that calculates the future value of an investment given interest rate, payment amount, and number of payments.
- <https://rpubs.com/fmarin7/376698> R Markdown Presentation -- created a simple presentation using Markdown and featured a plot created with Plotly.
- [https://github.com/fmarin7/Practical-Machine-Learning/blob/master/Practical Machine Learning Course Project.md](https://github.com/fmarin7/Practical-Machine-Learning/blob/master/Practical%20Machine%20Learning%20Course%20Project.md) Machine learning project. We were given some data about 6 individuals and whether they were performing exercises correctly or incorrectly based on the data provided. We had to create a training data set and a testing data set to predict how these individuals were performing.
